## **Maximum Permissible Exposure**

## 1. Applicable Standard

According to KDB447498 D01 General RF Exposure Guidence v05r02 standalone SAR test exclusion, SAR test is not required in 100MHz to 6GHz at test separation distances  $\leq$  50mm , if the output of EUT satisfy the fllowing eqation:[(max power of channel, including tune-up tolerance, mW)/(min test separation distance, mm)].[f (GHz)].  $\leq$  3.0 For 1-g SAR and  $\leq$  7.5 for 10-g extremity SAR.

- a. f(GHz)is the RF channel transmit frequency in GHz.
- b. Power and distance are rounded to the nearest mW and mm before calculation
- c. The result is rounded to one decimal place for comparison

## 2. MPE calculation

## Conducted output power

For WIFI

| Test CH | Maximum Conducted Output Power (dBm) |         |              |  |  |  |
|---------|--------------------------------------|---------|--------------|--|--|--|
|         | 802.11b                              | 802.11g | 802.11n(H20) |  |  |  |
| Lowest  | 9.83                                 | 8.41    | 8.20         |  |  |  |
| Middle  | 9.54                                 | 8.93    | 8.02         |  |  |  |
| Highest | 9.72                                 | 8.46    | 8.24         |  |  |  |

Maximum Permissible Exposure:

11b Lowest Channel: 2412MHz Max power=9.83dBm, 9.62mW Min test separation distance=5mm

[9.62mW/5mm]\*[2.412<sup>1/2</sup>]=2.988<3.0 For 1-g SAR

 $\label{eq:lambda} \Lambda ppendix \; \Lambda$  SAR Test Exclusion Thresholds for 100 MHz – 6 GHz and  $\leq$  50 mm

Approximate SAR Test Exclusion Power Thresholds at Selected Frequencies and Test Separation Distances are illustrated in the following Table.

|                                     |                                  |                                    |   |                                     | *                                    | 1                                       |
|-------------------------------------|----------------------------------|------------------------------------|---|-------------------------------------|--------------------------------------|---|
| MHz                                 | 5                                | 10                                 | 15  | 20                                  | 25                                   | шш                                      |
